

STONE.

Millions of years in the making, stone has few equals in durability, natural beauty and individuality. It is hard to find fault in natural stone as a striking adornment and a tough workhorse for the contemporary interior: for floors, worktops and other applications. Stone fireplaces perfectly complement our ancient union with the warmth and security of fire.

"The finest workers in stone are not copper or steel tools, but the gentle touches of air and water working at their leisure with a liberal allowance of time."

Henry David Thoreau, American essayist, poet and philosopher, 1817-1862

Henry and I : Richard Smythe wanted the website for his stone business to foster a deep appreciation and respect for his billion-year-old product and its peerless suitability in the home or workplace. I got a little help from Henry Thoreau, supporting my copy with a strong quote and leaving the reader with a perfect coda.
